-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 22 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 6-10 is/are allowed.
- 6) ☒ Claim(s) 1,3-5 and 11-13 is/are rejected.
- 7) ☒ Claim(s) 2 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With respect to claim 12, no method step has been recited after “further comprises”, only the structure of the side rails. Absent use of that recited structure in a method step requiring the structure, the claim fails to further limit claim 11.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 11, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by McComb #4,909,352. McComb discloses a ladder supported on the bed of truck/trailer the side rails of which are received within a pair of tubular holding means 68.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over McComb as advanced above. McComb fails to disclose cylindrical holding/receiving means. Cylindrical holding/receiving means is no more than an obvious design choice based upon the cross-section of ladder rails. Therefore to one of ordinary skill in the art, it would have been obvious to provide the holding means of McComb with cylindrical holding means so as to mate with ladder rails of similar cross-section.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over McComb as applied to claims 1, 3, 11, and 13 above, and further in view of Nelson et al. McComb fails to disclose steps having anti-slip material. Nelson et al teach the well-known utility of anti-slip material 16 secure to a rung of a ladder to reduce slippage of users thereon. Therefore to one of ordinary skill in the art, it would have been obvious to provide the steps/rungs of McComb with anti-slip material as taught by Nelson et al, so as to reduce slippage of users thereon.

***Allowable Subject Matter***

Claims 6-10 are allowed.

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter of claims 2 and 6 is the inclusion of a side rail that curves towards the other a predetermined distance and then proceeds parallel to the other for insertion into the receiving/holding means. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Art Unit: 3634

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ziaylek et al #6,378,654, Boyd #6,357,548, Griffin #4,858,725, Rainey #5,042,614, and Langhoff et al #6,622,822 are cited to teach ladder assemblies.
